

# Aubrey's Benefit

Aubrey, daughter of Tonya and Aaron Arechigo, was born June 17th, 2011 at Amplatz Children's Hospital in Minneapolis, Minnesota with Spina Bifida. She weighed 3 pounds, 11 ounces. As a Spina Bifida baby she has fluid in the brain so she has to have a shunt in her head to drain it out. Aubrey was also born with a cleft pallet, Acharri II Malformation and Pierre Robin Syndrome. She has dislocated hips and knee caps so she'll eventually have surgery on her jaw, hips and knees. Aubrey also has a G tube in which she feeds through. She has had 17 surgeries and has many more to go.
