Benefit

help mari recover

On December 8, 2011, at the age of 27, Mari suffered a brainstem stroke, in which an artery in her brainstem tore, causing blood to flow into her brain tissue. Mari has a long journey of recovery ahead of her. Unfortunately, Mari did not have health insurance at the time of her stroke, thus will not only be struggling to attain physical health, but will also have the stress of financial debt accompanying her along the way. To lessen this burden for her, we are asking for donations to help in this difficult journey.
